

**SACCO S.r.l. – STARTER CULTURE DIVISION****GMO STATEMENT**

Herewith SaccoS.r.l declares that our starter cultures are selected strains from natural sources of non-pathogenic lyophilised lactic acid bacteria. They are processing aids for the food industry and they are utilised for the production of food products for human consumption.

The microorganisms and all ingredients/carriers used for the production are not genetically modified (GMO) in accordance with European Directives No. 834/2007, No. 258/97, CE 1829/2003 and CE 1830/2003.

This statement is supported by certificates and statements received from our suppliers.

Cadorago,
