

Description	Lyoflora SYAB 1 consists of specifically selected strains of <i>Streptococcus</i>					
	<i>thermophilus</i> and <i>Lactobacillus delbrueckii</i> ssp. <i>bulgaricus</i> added with probiotic strains of <i>Lactobacillus acidophilus</i> and <i>Bifidobacterium animalis</i> ssp. <i>lactis</i> for soy products. This product is produced without milk derivates, and is standardised with Maltodextrin (from Maize).					
Application	Add the powder directly into process soy under aseptic conditions ensuring that the culture is well dispersed by gentle stirring. The following may be used as inoculation guidelines:
