### Rotation

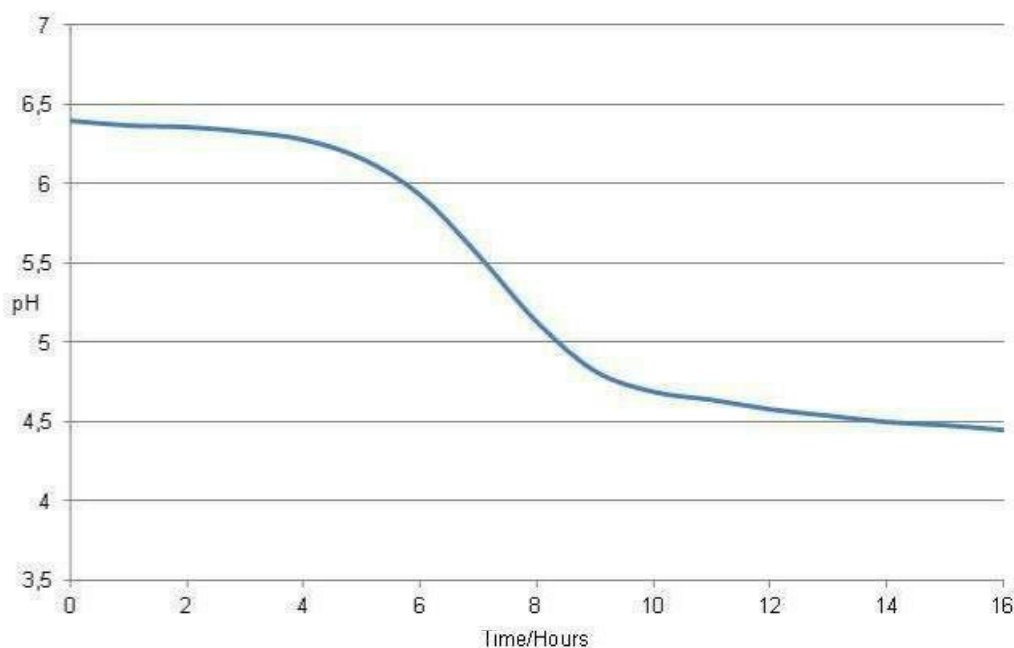

The recommended rotation is available upon request.

### Acidification information

Standardised laboratory acidification test is conducted in milk powder, reconstituted at 10%, at defined temperature.

Acidification profile: inoculation level corresponding to 1 UC per 100 litres milk.

Standard activity: expressed as temperature/time/pH relations: 32°C/7.5 hours/pH 5.4 ± 0.1.

### Culture information

Data are obtained under standardised laboratory conditions, and consequently, should be considered as guidelines.
