

Lyofast Y 450 B

Description **Lyofast Y 450 B** consists of specifically selected strains of a mild acidifying *Lactobacillus delbrueckii* ssp. *bulgaricus* and of a fast acidifying *Streptococcus thermophilus* which produces EPS enhancing viscosity, to ensure a uniform and controlled production of very mild set and stirred yoghurt with high viscosity..

Application Sprinkle the culture powder directly into process milk under aseptic conditions ensuring that the culture is well dispersed by gentle stirring. The following may be used as inoculation guidelines:

Product	UC/100 l	Product	UC/100 l
Yoghurt, short set	2.0-4.0	Yoghurt, long set	0.5-1.0

Rotation The recommended rotations are Y 452 B/Y 456 B.

Acidification information Standardised laboratory acidification test is conducted in milk powder, reconstituted at 9%, at defined temperature.

Acidification profile: inoculation level corresponding to 1 UC per 100 litres milk.
Standard activity: expressed as temperature/time/pH relations: 43°C/7 hours/pH 4.5 ± 0.15.

Culture information Data are obtained under standardised laboratory conditions, and consequently, should be considered as guidelines.

Optimal temperature for growth	43 °C	Urease activity	+
Acidification capability	pH 4.0	Texture formation	5.8 ± 1 sec/g
Aroma formation for yoghurt	+(+)	Post-acidification	Δ pH 0.27

Storage Unopened pouches should be kept below -17°C.

Package data The freeze-dried culture is packed in waterproof and airproof aluminium pouches. The packaging material is food grade. Lyofast Y 450 B is available in 10 and 50 UC.
